SENSATIONAL EDVENTURES ACTIVITIES

A New Culture of Educational Animation

My Goal

My goal is to offer specialized activities designed for groups of up to 20 with unique needs and considerations. Best for ages 6-16, low to mid functioning; however, each class is carefully tailored to meet the *specific* needs of your group.

Our classes cater to a wide range of abilities and include varying levels of difficulty. Activities range from simple verbal instructions to engaging non-verbal games, crafts, and sensory-based experiences.

A Sensory Learning Experience

Rather than starting the class with a PowerPoint/video lesson like in Curious Critters, we jump right into the activity! Inspired by the innovative methodologies of Temple Grandin and the Montessori approach to sensory learning, our classes are designed to provide a meaningful and inclusive experience. Whether you're looking for an energetic, party-like atmosphere to let loose or a calming and relaxed environment to unwind, with over 25 EDventures to choose from, we've got you covered!

What Makes Sensational EDventures Special

Activities include all necessary equipment and materials. Also, have a look out for special **Animal Picture Day** activities! These are when my calmest and most gentle critters come in to interact with students and pose for professionally edited picture day cards made for organizers to distribute to parents! Each class will also come with a newsletter featuring a group shot and a quick blurb on what the students experienced!

Get Started

To get your EDventures started, please contact Michelle or Frank for your submission form and more detailed information!
